Introduction
This handout provides supporting material for the Course Design workshop offered by the Center for Teaching Excellence. Student – centered teaching motivates the recommendations for instructors designing a new course or redesigning an existing one. The framework for student centered course design, covered in the Course Design and Structure, shapes the flow of the following material.

**Student-centered course design**
Course Design Template

Learning Goals

Use the space below to list your initial Learning Goals. Consider the following questions as you develop your list.

• What are the BIG questions that your discipline hopes to answer?
• Who are your students? What do your students need to learn? What are they prepared to learn?
• What subject matter (or content) goals are needed for these students? E.g. discipline specific knowledge, tools, framework
• What content-neutral outcomes are needed for these students? E.g. higher order thinking skills, attitudes or self-awareness

Learning objectives:

1. ____________________________________________________________
   ____________________________________________________________

2. ____________________________________________________________
   ____________________________________________________________

3. ____________________________________________________________
   ____________________________________________________________

4. ____________________________________________________________
   ____________________________________________________________

5. ____________________________________________________________
   ____________________________________________________________
Design and Structure: Topics

Use the space below to brainstorm:
What specific topics will you cover in this class to achieve your learning objectives?

1.

Pare the content list down to 4-7 topics:

2.

3.

4.

5.

6.

7.
Design and Structure: Order

The order of the course provides a narrative or organizing framework for your students. The materials and instructional strategies that you use support the course narrative for your students.

Draw a diagram representing your course.
Here are some ideas:
• Does the course move from macro to micro or the reverse - draw a hierarchy.
• Does the course follow a distinct path? Try stepping stones.
• Is there a central idea (in a circle) with related topics radiating outward?
**Design and Structure: Sequence of Topics**

The sequence of topics is the manifestation of the structure and order of course topics. Based on the topics that you've identified and their order, lay them out in the table below. What topics need to come first? How many class sessions will it take to cover each topic? How will the course end?

You may need to do this several times to pare all the content down into one semester. Courses at Haas are typically 7 weeks, 14 weeks (undergraduates) or 15 weeks.

Learning Activities and Instructional Strategies

- Cases
- Readings
- Interactive Discussions
- Simulations
- Debates
- Guest speakers
- Lecture
- Discussion board
- Presentations
- Think-pair-share
- Homework problems
- Essays
- Research
- Reflection papers
- Hands-on demonstrations

Above is a sample of instructional strategies and learning activities you might employ to deliver your course.

- Notice some of these strategies are assessments as well (See the section of this handout about assessments and grading for more explanation about assessments).
- You will need a variety of learning activities and instructional strategies to communicate the basic concepts and to require higher order thinking from your students.
Learning Activities and Instructional Strategies: Materials

You are now ready think about the specific materials for the course. List the types of materials you would like to use to support the course content and structure e.g., textbooks, articles, video, online content.

•
•
•
•
•
•
•
•

Once you have found the specific materials (e.g. exactly which textbook, cases or articles you will assign), you will be ready to align the different elements of your course.
Alignment
Learning Goals - Topics – Order - Instructional strategies – Learning Activities
Complete the following table to plan the main components of your course and to ensure coherence among the different elements. Verify that there is balance, rigor and a close alignment between the Learning Objectives, the Topics, the Structure, the Instructional Strategies, Learning Activities and Assessments.

<table>

How Students Learn
Research from UC Berkeley

Lave and Joyce (Anthropology)

Key learning principles:

Only learners can learn; teachers can’t learn for them.

Learning is a complex social phenomenon dependent on context.

Apprenticeship learning takes place through “legitimate peripheral participation.”

Metz and Schoenfeld (on Education)

Key learning principles:

Students learn more effectively when they are taught not only content but also problem-solving strategies.

Metacognition, the ability to analyze one’s own critical thinking process and to adjust it when necessary, is an essential element of robust learning.

Students learn most effectively when they are in a continual process of actively constructing their knowledge.

Learning is a communal endeavor that depends on enculturation into the norms of a discipline.

Kaufer on Neuroscience

Key learning principles:

Adequate sleep, nutrition, and exercise encourage robust learning.

Active learning takes advantage of processes that stimulate the brain and promote memory.

Moderate stress is beneficial for learning, while mild and extreme stress are detrimental to learning.
Shiamura and Kihlstrom (Cognitive and Social Psychology)

**Key learning principles:**
Students learn best when they take control of and organize their new knowledge.

Learning improves when new information is made meaningful for students.

Repetition and simple mnemonic study techniques can be extremely effective.

Testing encourages learning and can be used as a study tactic, in addition to a final assessment.

Covington and Lowery (Social Psych and Education)

**Key learning principles:**
Creating a learning environment that leverages intrinsic motivation, rather than on grades, improves the quality of students’ learning.

Course content can be integrated with motivational principles in order to promote robust learning.

Content knowledge alone is not enough to make an instructor effective; an understanding of how learning works is also essential.

Effective teachers use curiosity to motivate students and promote memory.

Effective teachers use different methods to teach skills and knowledge.

Effective teachers tap into students’ prior knowledge and address misconceptions.

**Syllabus**
On the following pages is an exhaustive list of possible elements to include in a syllabus. The Center for Teaching Excellence also has sample syllabi for you to use.

Helpful reminders:
- The syllabus is a form of learning contract.
- The syllabus is a resource that can pique students’ interest
- Including more rather than less reduces anxiety and can be a learning tool.
- End the syllabus on a positive upbeat note.
# Checklist: Components of a Comprehensive Course Syllabus

*From Tools for Teaching (2009) by Barbara Gross Davis*

</tbody>
</table>
### Requirements

- **Exams and quizzes:**
  - How many
  - What kind (e.g. open/closed book; essay/multiple choice)
  - Knowledge and abilities tested
  - Place, date, and time of finals exam

- **Assignments/problem sets/projects/reports/research papers:**
  - General information on type, length, and when due (detailed information can be distributed during the term)
  - Relationship between the learning objectives and assignments
  - Criteria for assessing student work
  - Format for submitting work (online or in hard copy)
  - For research papers and projects:
    - Steps in conducting research
    - Shorter assignments that build to the research paper (e.g. annotated bibliography of primary sources, thesis statement, fact sheet, etc.)
    - Skills and knowledge students need to complete the assignment
    - Connection between research assignments and course goals and student learning objectives

- **Other requirements:**
  - Attend an office hour?
  - Post comments to the discussion board?

### Policies

- **Grading procedures:**
  - Describe how students will be graded: on a curve or absolute scale?
  - Clarify weighting of course components
  - Explain policies regarding incompletes, ass/not pass
  - Describe grade appeals

- **Attendance and tardiness**
- **Class participation**
- **Classroom decorum**
- **Interrupted exams (e.g. fire alarms)**
- **Missed exams/makeup exams**
- **Missed assignments**
- **Late assignments/extensions**
- **Reporting illness and family emergencies**
- **Extra credit opportunities**
- **Permissible and impermissible collaboration**
- **Standards for academic honesty and penalties for infractions**

### Schedule

- **Tentative calendar of topics and readings:**
  - By week rather than by session
  - Or leave some sessions empty for flexibility

- **Firm dates for exams and written assignments**

- **Dates of special events:**
  - Field trips
  - Performances
  - Exhibits
  - Other special events

- **Last day to switch to pass/not pass**
- **Last day to withdraw from the course**

Assessment

Twelve assessment techniques

1. **Applications cards** - Identify a concept or principle your students are studying and ask students to come up with 1-3 applications of the principle from everyday experience, current news events, or their knowledge of particular organizations or systems discussed in the course.

2. **Analytic Memos** - Ask students to write a one- or two-page analysis of a specific problem or issue. The person to whom the memo is written is usually identified as an employer, a client, or stakeholder who needs the analysis to make an informed decision. (Be explicit about the setting, the person, the purpose and the subject.) Students can work individually, in pairs, or small groups. Feedback should be based on 3-5 major points, using a rubric.

3. **Concept Maps** - Concept maps are diagrams showing connections between a focal topic and other concepts learned. The main concept is in the center with connections drawn to other concepts above, below, to the side. To begin, show students a concept map that you have drawn. Discuss the main idea and connecting concepts that you have included. Next, prompt students to make a concept map beginning with the central concept (e.g. diffusion of knowledge) in the center of a blank sheet of paper. Ask them to add in other ideas (e.g. learning, delivery, action, storytelling) or concepts that come to mind. Collect the sheets anonymously. Reviewing the students’ concept maps reveals the depth of understanding that students have about course topics and how they are thinking about them.

   Options:
   a. Create a concept map with some of the concepts missing. Provide a list for student to use to fill-in the missing concepts.
   b. Repeat the concept map assignment later in the term to observe the development of student thinking.
   c. Ask students to write an explanatory essay based on their maps.

4. **Dynamic list of questions** - As a homework assignment, ask students to write a list of questions that they hope to answer by the end of the class period. During class they cross off questions as they are answered and add questions as new ones arise. At the
end of class, collect the lists for a snapshot of preparation, learning and unanswered questions.

5. **Word Journal** - Requires a two-part response. Firstly, students summarize a short text with a single word. Next students write a paragraph or two explaining why they chose that particular word to summarize the text. The complete word journal entry is an abstract or synopsis of the focus text.

6. **Empty outline** - The instructor distributes an empty or partially completed outline either as an in-class presentation or a homework assignment. Students should have a limited amount of time to complete the missing information. Can be used at the conclusion of a class or the beginning of the next one. If the course is too large to provide individual feedback, this technique can be assigned to groups or to generate class discussion.

7. **Muddiest point** - Similar to the Minute Paper, ask your students to answer: “What was the muddiest point in… (today’s lecture, the reading, the homework)?” Students need to identify fairly quickly (in 1-2 minutes) what they do not understand and submit it on an index card.

8. **One-minute paper** - Pose 1-2 questions in which students identify the most significant things they have learned from a given lecture, discussion or assignment e.g. “What was the most important thing that you learned today?” The question can be very general or content specific. For example, “What question is upper most in your mind at the end of today’s class?” Their answers help you to determine if they are successfully identifying what you view as most important. Give students about 1-2 minutes and ask them to write a response on an index card, or no longer than a half page.

9. **Online polling** - Post multiple-choice questions about key concepts on the course website. Students can select the best answer. Once they submit their answer they can view a summary graph of the class results. Share correct answers in the next class session. Students can receive credit for responding, but responses are not graded.

10. **Online reactions** - Ask students to post their reactions to that day’s lecture or class discussion on a discussion board. Comments should be anonymous. Online questions can ask students to rate how challenging the topic was, to indicate an important point or identify a hard-to-follow portion of the class session.

11. **Think-pair-share** - Pose a question, and ask students to consider the question, jotting down a few ideas, and then turn to a neighbor and share their thoughts. Next the pairs report their discussion to other pairs and, as size and time permits, to the class.

12. **What’s the principle?** - Provide students with a few problems/examples and ask them to state the principle that best applies to the problem.
## Aligning Learning Objectives and Types of Assessment

<table>
<thead>
<tr>
<th>Types of Learning Objective</th>

- plan
- produce
## Sample Rubrics

### For written cases analyses

<table>
<thead>
<tr>
<th>Criteria</th>
<th>A</th>
<th>B</th>
<th>C</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Arguments</strong></td>
<td>Paper has clear, strong arguments that go beyond description</td>
<td>Paper has discernible arguments but may be somewhat unclear or weak</td>
<td>Paper has arguments but often falls into description</td>
<td>Paper has few or no arguments, spends most time describing</td>
</tr>
<tr>
<td><strong>Support</strong></td>
<td>Numerous, varied and relevant details and facts support arguments</td>
<td>Details and facts support arguments, but may not provide enough or may be as relevant as possible</td>
<td>Some details and facts to support arguments, but not enough and some lack relevancy</td>
<td>Few or no relevant details and facts to support arguments</td>
</tr>
<tr>
<td><strong>Use of course concepts</strong></td>
<td>Demonstrates excellent understanding of course concepts and applies them correctly</td>
<td>Conveys course concepts adequately but fails to elaborate</td>
<td>Correctly grasps basic concepts but cannot apply to situation appropriately</td>
<td>Basic course concept(s) is wrong, incorrect, or substantially incomplete</td>
</tr>
<tr>
<td><strong>Originality</strong></td>
<td>Demonstrates excellent analytical originality, either in creating new arguments or in relating facts in new ways (beyond what is suggested by sources)</td>
<td>Demonstrates some, but not a great deal of, analytical originality, either in creating new arguments or in relating facts in new ways</td>
<td>Demonstrates little analytical originality, relies mainly on arguments and evidence already covered in class or suggested by case or other sources</td>
<td>Makes no attempt to provide original analysis</td>
</tr>
<tr>
<td><strong>Organization</strong></td>
<td>Clear organization that walks the reader through the paper, does not stray off topic</td>
<td>Clear organization but strays slightly</td>
<td>Organization is less than clear, or organization is clear but some digressions</td>
<td>Organization is unclear and/or paper strays substantially from topic</td>
</tr>
<tr>
<td>Criteria</td>
<td>A</td>
<td>B</td>
<td>C</td>
<td>D</td>
</tr>
<tr>
<td>--------------------------</td>
<td>------------------------------------------------------</td>
<td>-------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------</td>
</tr>
<tr>
<td>Level of discourse</td>
<td>Variety of sentence structures, good use of cohesive devices, e.g. transitions</td>
<td>Some variety in sentence structure, adequate use of cohesive devices</td>
<td>Limited variety in sentence structure, little use of cohesive devices</td>
<td>Mostly single-clause sentences, little to no use of cohesive devices</td>
</tr>
<tr>
<td>Grammar</td>
<td>No major errors, a few minor errors that do not distract</td>
<td>One major error or several minor errors that do not distract</td>
<td>Two or three major errors combined with minor errors</td>
<td>Numerous major errors</td>
</tr>
<tr>
<td>Vocabulary</td>
<td>Precise diction, rich use of appropriate vocabulary</td>
<td>Generally good vocabulary choices with some variety, minor errors in diction</td>
<td>Limited vocabulary, not always precise or accurate</td>
<td>Incorrect use of vocabulary, very limited range</td>
</tr>
</tbody>
</table>

**Class participation/contribution rubric**

1 point - Has read the case and other reading materials and is somewhat aware of the issues.

2 points - Has prepared the case thoroughly and dug deeper and grasped the main points and key issues in the case.

3 points - By extensive preparation has analyzed the case fully and lucidly expounded analyses and proffered cogent recommendations and overall has contributed substantially to class learning.

4 points - Through extensive preparation has been able to build frameworks and managerial learnings by linking case analyses and learnings from previous cases with the current case, contributed very substantially to class learning, and steered class discussion to areas providing additional learning.

5 points - Contributed extremely to class learning and taught the faculty something about the case.
Common Grading Practices at Haas

The following is a list of frequently-used graded assignments. Depending on the discipline and instructor preference, different weights are assigned to different assignments.

- Homework problem sets
- Multiple choice and matching tests/quizzes
- Problem set tests
- Short answer and essay tests
- Written case analyses (in-class and take home)
- Presentations (individual and group)
- Research projects (individual and group)
- Participation

Breakdown of Grading Practices in MBA and Undergraduate Courses

Core MBA:
The MBA core courses create a balance between individual performance and the ability to work with others by holding an emphasis on both examinations and participation and group projects. Courses with a specific focus in communication and leadership may weight oral and written assignments greater. The norm is to not have 100% on the final and it is more typical to have a midterm and final.

Class Participation and Attendance: Ranging from 0 to 40%
Exams: Ranging from 20 to 90%
Writing Assignments: Ranging from 0-66%
Group Projects: Ranging from 0-40%
Other (Cases, Projects, Oral Assignments, Research and Homework): Ranging from 0-30%

Elective MBA:
The MBA elective courses focus around a variety of case studies. Students are mainly graded on their execution with individual or group projects based on the cases that are taught. Compared to other programs, there is a large emphasis placed on participation across a majority of these courses. The norm is to not have 100% on the final and it is more typical to have a midterm and final.

Class Participation and Attendance: Ranging from 0-40%
Exams: Ranging from 0-80%
Writing Assignments: Ranging from 0-50%
Group Projects: Ranging from 0-80%
Other (Cases, Projects, Oral Assignments, Research and Homework): Ranging from 0-40%

Core Undergraduate:
A vast majority of the undergraduate core courses place a large emphasis on examinations, ranging from 50-85% depending on the topic being taught. The remainder of the course grade is placed on student attendance, participation and assignments. The norm is to not have 100% on the final and it is more typical to have a midterm and final.
Class Participation: Ranging from 0-20%
Exams: Ranging from 0-85%
Writing Assignments: Ranging from 0-40%
Group Projects: Ranging from 0-40%
Other (Cases, Projects, Oral Assignments, Research and Homework): Ranging from 0-30%

Elective Undergraduate:
The undergraduate elective courses place a large emphasis on examinations and group projects. Courses with a specific focus in communication and leadership may have a higher weight on oral and written assignments. The importance of student attendance and participation remains similar to that of the undergraduate core courses. The norm is to not have 100% on the final and it is more typical to have a midterm and final.

Class Participation: Ranging from 0-40%
Exams: Ranging from 0-90%
Writing Assignments: Ranging from 0-65%
Group Projects: Ranging from 0-45%
Other (Cases, Projects, Oral Assignments, Research and Homework): Ranging from 0-30%

Berkeley – Hass Grading Guidelines

Available online at:
https://groups.haas.berkeley.edu/AcademicAffairs/Bylaws/documents/Policy%20on%20Grading%20-%20May%202013.pdf

POLICY OF THE HAAS SCHOOL OF BUSINESS
WITH RESPECT TO GRADING

The Haas School seeks to assign grades that reflect students’ performance, in accordance with UC Berkeley’s grading policy, which states:

“The work of all students on the Berkeley campus is reported in terms of the following grades: A (excellent), B (good), C (fair), D (barely passing), F (failure), P (passed at a minimum level of C-), NP (not passed), S (satisfactory, passed at a minimum level of B-), U (unsatisfactory), I (work incomplete due to circumstances beyond the student's control, but of passing quality), IP (work in progress; final grade to be assigned upon completion of entire course sequence). The grades A, B, C, and D may be modified by plus (+) or minus (-) suffixes.”
Special Provisions – Graduate Students
“Only courses graded A, B, C (with or without plus or minus signs), or S are accepted in satisfaction of degree requirements. Courses graded below C- do not yield credit toward a higher degree, regardless of your overall GPA.”
(http://berkeley.edu/catalog/policies/grades.html)

The Haas School policy with respect to grading has three goals: to ensure that grading is fair across courses; to encourage students to take their coursework seriously; to hold faculty accountable to the rigorous standards of the Haas School of Business. All instructors who teach Undergraduate, Full Time MBA, Evening and Weekend MBA, Executive MBA, or MFE courses will be required to follow this grading policy. Only PhD courses are exempt.

If an instructor wishes to submit grades that would violate this policy, the instructor must explain in writing to the Senior Assistant Dean for Instruction (SADI) why the course, and the distribution of students who are enrolled, warrant a deviation from this policy. Written approval from the SADI must be obtained to proceed with a higher mean GPA for the class. Deviations for classes with more than 18 students must be approved by both the SADI and the Dean of the Haas School. Such waivers should be rare. In the event of such an approved deviation from the policy, the mean GPA of any course should not exceed 3.65.

The SADI will report annually to the Policy and Planning Committee on the courses for which waivers have been issued, the reasons for the waivers, and any policies that the SADI has established for such waivers.

As with all UC Berkeley courses, letter grades are assigned a point value as follows:

\[
\begin{align*}
A+ &= 4.0; \quad A- = 3.7; \quad B+ = 3.3; \quad B = 3.0; \quad B- = 2.7; \quad C+ = 2.3; \quad C = 2.0; \quad C- = 1.7; \\
D+ &= 1.3; \quad D = 1.0; \quad D- = 0.7; \quad \text{and} \quad F = \text{none.}
\end{align*}
\]
Mean Course GPA Requirements for Masters-level Courses

When assigning grades, the mean GPA in any MBA, EW MBA, or XMBA class with enrollments of 18 or more students should be no more than 3.45 in core courses and 3.50 in elective courses. The mean GPA in any MFE core or elective course should be no more than 3.50.

Grading Requirements for Undergraduate Courses

When assigning grades to a core course in the undergraduate program, the mean GPA in any class should be no more than 3.20-3.40. For elective courses with enrollments of 18 or more, the mean GPA in any class should be no more than 3.40-3.60.

Monitoring and Reporting

After grades are assigned the SADI’s office will calculate the mean GPA of all courses and the distributions of grades for all core courses. Instructors whose grade assignments violate this policy will be promptly notified by the SADI and asked to immediately amend their assigned grades to satisfy this policy’s requirements.

Enforcement and Consequences

If for any reason a grade assignment that violates this policy is not corrected, the SADI will report such violations to all the Haas instructors, to the ADAA and to the Dean via an email that lists the violators, their courses, and the complete grade distribution of their course. If any of the violations was for a class of less than 18 students, and was approved by the SADI, the SADI will include in the email the reasons for the exceptional approval.

Group Chairs and the SADI are responsible for communicating the importance of this policy to all Haas instructors. Group Chairs and the ADAA will consider any such violations when making non-ladder appointments or reappointments, and when discussing teaching in ladder merit cases. The SADI will inform non-ladder faculty that violations of this policy may result in a termination of their teaching for the Haas School of Business.
Haas Grading Curve Policies
May 2013

- Full Time MBA
  - No Forced Distribution
  - Core
    - Max. Mean GPA: 3.45
  - Elective
    - Max. Mean GPA: 3.5

- EWMBA
  - No Forced Distribution
  - Core
    - Max. Mean GPA: 3.5
  - Elective
    - Max. Mean GPA: 3.5

- Berkeley MBA for Executives
  - No Forced Distribution
  - Core
    - Max. Mean GPA: 3.5
  - Elective
    - Max. Mean GPA: 3.5

- MFE
  - No Forced Distribution
  - Core
    - Max. Mean GPA: 3.5
  - Elective
    - Max. Mean GPA: 3.5

- Undergraduate
  - No Forced Distribution
  - Core
    - Max. Mean GPA: 3.4
  - Elective
    - Max. Mean GPA: 3.6
Electives:
a.) For elective classes with enrollments of fewer than 18 students, an instructor who wishes to violate this policy must explain in writing to the ADI why the course, and the distribution of students who are enrolled, warrant a deviation from this policy. Written approval from the Senior Assistant Dean of Instruction (SADI) must be obtained to proceed with a different mean GPA for the class. In the event of such an approved deviation from the policy, the mean GPA of any course should not exceed 3.65.
b.) For elective classes with enrollments of 18 or more students, the process for obtaining an approved deviation from this policy will require not only the SADI’s approval as described above, but will also require written approval from the Dean of the Haas School. Such waivers should be rare. In the event of such an approved deviation from the policy, the mean GPA of any course should not exceed 3.65.

Core: UGBA 100 has a mean of 3.4.
