

Supporting Youth Today for College Tomorrow

2018 Application

Dear applicant,

Thank you for your interest in becoming a part of the boost program at the Haas School of Business. This letter introduces the program and its application process.

Giving students the inspiration and confidence to dream big, boost is a four-year program that exposes under-served Bay Area high school students to the world of business and the possibility of pursuing higher education. Through lessons and group projects, students develop skills for the academic and economic success to reach their dreams.

By participating in boost, students learn about and develop skills in:

- **College Readiness.** Students will learn how to best navigate the path to college through various age appropriate workshops.
- **Communication.** Students will learn the etiquette of speaking, writing, and presenting their ideas to others.
- **Computer Technology.** Students will learn to use computers to conduct research, compile information, and develop PowerPoint presentations.
- **Entrepreneurship.** Students will learn to identify market needs and business structures, as well as how to apply that information to their own projects.
- **Financial literacy.** Students will learn how to track expenses, create a budget, compare and use banking services, and understand credit scores.
- **World of Work.** Students will create and update their resumes, how to interview effectively and how to act in a professional environment including internships.
- **Teamwork.** Students will learn team formation, problem-solving strategies, and inter-group communication skills that are essential to working with others.

BerkeleyHaas

Because boost works with students from their first-year of high school through graduation to build on increasingly sophisticated foundation of business skills and principles, the program requires a four-year commitment to ensure the students' development in all areas of the program. To that end, the staff have developed and designed grade-level specific programs that allow students to build upon their skills each year they're involved in the program. For example, first-year students attend a two-week summer camp. During the fall semester, these students attend workshops and participate in group activities related to program lessons two Saturdays each month with one focused on college readiness and the other working on their business case project in teams with their mentors.

This program is **free** to students, and only eighth grade students are eligible to apply. All 8th grade students can apply, although preference is given to low-income students from Bay Area public schools with a 2.5-3.5 GPA who would be first in their family to attend college.

To apply, students must download an application, which is available at www.haas.berkeley.edu/boost/programs.html. Students should then submit their completed application and supplemental program forms by April 6, 2018; students can submit these materials by mail or e-mail.

Qualifying applicants will receive an e-mail notification in late-April for interviews, which will take place in early May. After these interviews conclude, we will send acceptance letters to admitted students.

If, after downloading and reviewing the application, you have further questions please e-mail boost's Director at labbott@haas.berkeley.edu.

For more general information please go to the [Boost website](#).

Thank you and good luck!

Lucas R. Abbott
