Creating a Diverse, Multidisciplinary Talent Pipeline to the Global, Plant-Rich Food and Agricultural Sectors

Open to all majors, the Plant Futures Challenge Lab is a special course that blends in-class learning with applied field experience. Top undergrad and grad students are paired on multidisciplinary teams to work with professional clients from leading food systems organizations to develop actionable solutions to present-day challenges in the plant-based food and agricultural sector.

Students will be guided throughout the learning journey by the teaching team and their challenge partner mentors through a series of team meetings, lectures, and workshops and will learn and practice systems thinking and design, ethical leadership, and entrepreneurial agency.

Non-MBA students must submit an interest form to be considered:
