Berkeley Haas

Recording Notice

As a participant in the MBA Alumni Audit Program, I understand that I will be attending MBA elective courses at Berkeley Haas. In order to improve student optionality and the student learning experience, Berkeley Haas uses livestreaming and recording technology in MBA elective courses. Use of these technologies allow:

- Students to participate in courses remotely
- Students to watch video recordings of classes and events they could not attend in person
- Prospective students to observe first hand our unique Haas culture via livestream as they decide whether to apply or accept an offer of admission
- Students to view course recordings for courses they are not enrolled in to help them decide on electives to enroll in or as an enrichment opportunity
- Other Haas alumni to audit electives as part of the MBA Alumni Audit Program

In recognition of these practices, I acknowledge that the course I audit may be livestreamed via the internet and/or recorded.

Livestream viewing of courses is available to:

- Haas alumni auditing courses, approved pursuant to UC Berkeley's auditing policy;
- Prospective students approved in advance.
- Faculty/staff as appropriate under UC Berkeley policy.

Recordings of courses are available for viewing to:

- Students registered in the course;
- Current students in the EWMBA Program (who may or may not be registered in the particular course)
- Faculty/staff as appropriate under UC Berkeley policy.

I understand that, as a result, my personally identifiable information may be disclosed to individuals with access to the livestream and/or recordings, as described above. The information may include: my name, the course I am auditing, and recordings of my participation in the course.

I consent to my participation in class lectures being recorded, and to the disclosure of any personally identifiable information as described above. This authorization will remain in effect until the conclusion of the course I am auditing.

I understand that I can maximize my privacy in livestreamed or recorded courses by engaging in one or more of the following practices:

- Modifying my display name
- Disabling video and/or audio inputs
- Engaging via chat rooms rather than by asking questions by audio/video channels

For more information on privacy practices I can use during recorded or live streamed courses or events, contact UC Berkeley's Student Technology Services.

For more information regarding UC Berkeley's privacy policies, contact the Privacy Office.
