Overview of Windscape AI

- Windscape.ai will increase wind farm energy production and turbine life by giving alerts of wind changes and gusts 15-60 seconds ahead of time.
- We use AI pattern recognition of telltale atmospheric signals.
- Wind farms increase energy production with optimized pitch and yaw settings.
- Gearbox and blade damage decreases as blades feather ahead of gusts.
- Wind farm ROI increases.
- AI uses known techniques.
- Hardware is ultra-low cost, robust, off-the-shelf.
- Patented.
- Proof of concept completed.
- $100M serviceable US market. $600M worldwide.
