

Windscape AI

- Windscape AI will increase wind farm energy production and turbine life by giving alerts of wind changes and gusts 10 seconds - 10 minutes ahead of time.
- We use AI analysis from low cost sensors in the field.
- Wind farms increase energy production with optimized pitch and yaw settings.
- Gearbox and blade damage decreases as blades feather ahead of gusts.
- Wind farm ROI increases.
- Hardware is ultra-low cost, robust, off-the-shelf.
- Patented.
- Proof of concept completed.
- Pilots under way.
- \$1.5B serviceable market.
