**TEACHING TIP OF THE WEEK**

Online Teaching Strategies

**Tip of the Week:** Use project-based learning to connect your classroom to the business world!

Experiential learning is [a core component](#) of Haas degree programs, and working on real-world projects (including [online projects](#)) [significantly boosts student learning](#). As an alternative or addition to traditional end-of-semester assessments, some of which have been harder to implement under distance learning, try incorporating a real-world final project into your classroom to enrich students' experience. Here is how you can get started:

1. **Begin with a driving question.** What is a realistic problem or part of a problem that students could solve using knowledge and skills from your course? For example, students could help a company increase efficiency in its supply chain, or develop a growth plan for expanding operations. To increase relevance for students, look for opportunities to let them choose or shape their own question.
2. **Use platforms such as Riipen to find questions and partners.** [Riipen](#) is an experiential learning platform and marketplace for project-based learning that offers end-to-end support — from course ideation and design to matchmaking, technical support, and student onboarding. Industry partners are available from across the U.S. and Canada.

3. **Support students' progress with milestones and tangible products.**  
End-of-semester final projects can be daunting, but setting milestones throughout the semester for students to build up to their final products can help them stay on track. To provide extra support, you can use existing open-source datasets, presentation templates, and technology such as [Jamboard](#) or [Jupyter](#) to help students design and present their projects. For maximum impact, invite target companies to view student presentations or write-ups.
  4. **Book a consultation with Haas Digital** to talk about how to bring project-based learning into your course or to get started using edtech such as Riipen.
